

Powercor Asset Inspection Services

Duration: 1997 to 2018

Client: Powercor Australia and CitiPower

Location: Melbourne Metro & Western Victoria

DESCRIPTION

In June 2015 Electrix achieved a major milestone with the renewal of the Asset Inspection contract servicing Powercor and CitiPower. This contract renewal built on the strong relationship enjoyed with Powercor over almost 18 years of providing similar services in their network area.

The contract has progressively expanded and today involves inspection of approximately 180,000 poles per annum under a combination of 5 year and 2.5 year cycles.

SCOPE

The scope of work include the provision of:

- Field inspection resources and management support team comprising approximately 65 personnel;
- Inspection, condition assessment and reporting of:
 - distribution poles below and above ground line
 - pole top structures
 - cross arms including top face inspection
 - mains conductors and overhead services
 - street lights
- Identification and implementation of new and innovative technology and work practices;
- Comprehensive monthly customer reporting system;
- Supply and management of consumable materials to treat poles and undertake minor maintenance;

VALUE TO CLIENT

Throughout the 18 year plus history of this contract, Electrix has continued to enhance service delivery and expand the range of services delivered. This has assisted Powercor and CitiPower to achieve key strategic objectives including:

- Maintaining distribution network safety, reliability and integrity
- Optimising network maintenance expenditure and program efficiency
- Maintaining high levels of customer service
