

Transport

*Pride Performance Value*

*Sound transport infrastructure is essential to any growing economy and we are a leader in the provision of infrastructure services installations.*

*Our experience working in fully operational transport environments allows our customers to keep their customers moving.*

**Transport**

We apply our experience and uncompromising safety and logistics procedures in providing specialist services to the transport sector.

---

### **Continuity of Services**

Transport is a unique and potentially dangerous environment that requires specialist skills and experience. It also requires the ability to liaise with multiple stakeholders to ensure asset owners can provide continuity of services while electrical works are completed.

Electrix has an impressive safety record that reflects our safety systems and capabilities for working in fully operational environments. We maintain a significant investment in our people with their training benefiting both our public and private transportation customers.

---

### **National Coverage & Capability**

Electrix has an extensive network of branches across Australia and New Zealand. This provides our customers with local access to an experienced management team and workforce that are highly skilled in completing specialised work in challenging environments and within tight time frames.

Our capabilities are recognised in the transport sector where our ability to offer innovative solutions has enabled us to consistently add value and achieve project efficiencies on behalf of our customers.

Our experience encompasses a range of working environments from busy city centres and transport hubs to remote rural locations.

---

Electrix customers also benefit from our capability to provide ongoing preventative, scheduled and on-call break down maintenance services. Our experience in this area ensures outages for planned upgrades and major maintenance are managed effectively to minimise disruption.

---

### **Safety**

Safety is paramount across all our operations and safety awareness is embedded in our culture. Electrix is committed to providing a safe work environment for all employees and stakeholders and our highly developed, fully accredited safety management systems are integral to all our business activities.

---

### **Management Systems**

A key success factor for transport projects is the application of effective project management skills and systems. Electrix is highly skilled in implementing project management systems to accommodate our customers' requirements, and provide quality documentation to support our customers in management of their projects and meeting regulatory requirements.

## People & Skills Development

Electrix recognises our main asset is our people and invests heavily in the development and retention of employees. Electrix is considered an employer of choice and employees receive both in-house and external training and development programmes to continually improve their skills.

The development of our employees allows us to provide career progression opportunities and promotion from within the organisation. This results in a skilled, high performing and loyal team culture and stable workforce and industrial relations.

Working in city centres and rural locations

---

## Electrix

We are a leading provider of electrical engineering, construction and maintenance services to asset owners in the commercial, infrastructure, utility, industrial and resources sectors.

Our capability means that we are a true end-to-end service partner.

With experience and understanding comes the ability to adapt and innovate and consistently create opportunities to improve efficiency and deliver better outcomes.

The ability to operate in remote locations and across wide geographical areas means we understand and meet the logistical and practical challenges involved with major projects and work programmes.

To each and every engagement we bring our experience and technical expertise along with a commitment to safety, quality, innovation and the environment.
